RECA WYVERN BARRACKS

Electrical installation condition report requested by client

Date(s) on which inspection and testing was carried out 08/01/2020

## TION C: DETAILS OF THE INSTALLATION THAT IS THE SUBJECT OF THIS REPORT

Occupier:	BUILDING 1 - V	WYVERN E	BARRACKS	Address:	BUILDING 1, WYVERN BARRACKS, BARRACK ROAD, EXETER							
Details of prem	nises:	Commerci	ial			Post code	EX2 6AE					
Estimated age	of wiring:	>15 Years	3			Additiona	Details	N/A				
Evidence of ac	dditions/alterations	:	Yes			Yes, estin	nate age:	= 5 Years				
Installations re	cord available? (R	egulation 62	21.1):	No		Date of la	st inspection:	06/01/202	0			

### ECTION D: EXTENT AND LIMITATIONS OF INSPECTING AND TESTING

Extent of electrical installation covered by this report:

Visual inspection of suppliers terminal equipment, inspection & test of main protective & supplementary bonding & final circuits. Due to limitation of access, lighting circuits may be tested at the switch. Supplies not provided by a distributor (e.g. photovoltaic) are excluded.

Agreed limitations including the reasons (Regulation 634.2):

Testing to be carried out in accordance with GN3 guidelines.

No disturbance of building fabric, fittings or sealed covers. No testing of boiler controls & circuits, emergency lighting, fire & intruder alarms and portable appliances. L-L IR test where practicable.

Operational Limitations including the reasons

Agreed with:

Client

The inspection and testing detailed in this report and accompanying schedules have been carried out in accordance with BS 7671: 2018 (IET Wiring Regulations). It should be noted that cables concealed within trunking and conduits, under floors, in roof spaces, and generally within the fabric of the building or underground, have not been inspected unless specifically agreed between the client and inspector prior to the inspection. Inspection of accessible roof space housing other electrical equipment only if practicable. 1 Limitation (LIM) 5.1 Limitation (LIM) 5.10 Limitation (LIM) 5.11 1

## ECTION E: SUMMARY OF THE CONDITION OF THE INSTALLATION

General condition of the installation (in terms of safety):

On completion of any remedial works, the installation would be generally satisfactory

Overall assessment of the installation in terms of its suitability for continued use:

\*An unsatisfactory assessment indicates that dangerous (code C1) and/or potentially dangerous (code C2) and/or further investigation has been deemed required (code FI) conditions have been identified.

Where the overall assessment of the suitability of the installation for continued use above is stated as UNSATISFACTORY, I/we recommend that any observations classed as 'Danger present' (code C1) or 'Potentially dangerous' (code C2) are acted upon as a matter of urgency. Investigation without delay is recommended for observations identified as 'Further investigation required' (code FI). Observations classified as 'Improvements recommended' (code C3) should be given due

Subject to the necessary remedial action being taken, I/we recommend that the installation is further inspected and tested by:

05/01/2020

I/We being the person(s) responsible for the inspection and testing of the electrical installation (as indicated by my/our signatures below), particulars of which are described above, having exercised reasonable skill and care when carrying out the inspection and testing, hereby declare that the information in this report, including the observations and the attached schedules, provides an accurate assessment of the condition of the electrical installation taking into account the stated extent and limitations in Section D of this report.
