Electrical Installation Condition Report

Requirements for Electrical Installations - BS 7671:2018 (IET Wiring Regulations 18th Edition)

Information for recipients:

The purpose of this report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section E). The Report should identify any damage, deterioration, defects and/or conditions which may give rise to danger (see Section K).

Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section D.

The person ordering the report should have received the Original©Report and the inspector should have retained a duplicate.

For items classified in Section K as C1 ("Danger Present"), the safety of those using the installation is at risk, and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work immediately.

The Original©Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner/occupier with details of the condition of the electrical installation at the time the Report was issued.

For items classified in Section K as C2 ("Potentially Dangerous"), the safety of those using the installation may be at risk and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.

Where the installation incorporates residual current devices (RCDs) there should be a notice at or near the devices stating that they should be tested every 6 months. For safety reasons it is important that these instructions are followed.

Where it has been stated in Section K that an observation requires further investigation code FI the inspection has revealed an apparent deficiency which may result on a code C1 or C2 could not, due to the extent or limitations of this inspection, be fully identified. Such observations should be investigated as soon as possible. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section F).

Section D (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The Inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licencing authority, insurance company, mortgage provider and the like) before the inspection was carried out.

For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons competent in such work. The recommended date by which the next inspection is due is stated in Section F of the report under 'Recommendations' and on label at or near to the consumer unit/distribution board.

ELECTRICAL INSTALLATION CONDITION REPORT - DB Inspection Schedule

for Industrial/Commercial Premises

Requirements for Electrical Installations BS7671:2018+A2:2022 (IET Wiring Regulations 18th Edition)

or

FT/

3486000001591

N/A

In the outcome column use the codes above. Provide additional comment where appropriate. C1/C2/C3 and FI coded items to be recorded in section K of the condition report.

OB/CU Ref: Entire Installation

DB/CU Location: N/A

DB/CU Ref:	Entire Installation DB/CU Location: N	/A	
Item No.	Description		Outcome
1.0 CONSU	JMER UNIT/DISTRIBUTION BOARD(S)		
1.1	Adequacy of working space/accessibility to consumer unit/distribution	on board (132.12; 513.1)	
1.2	Security of fixing (134.1.1)		
1.3	Condition of enclosure(s) in terms of IP rating (Barriers etc) (416.2)		0
1.4	Condition of enclosure(s) in terms of fire rating etc (421.1.6; 421.1.2	AN SAME DOMESTIC OF B	Ø
1.5	Enclosure/obstacles not damaged/deteriorated so as to impair safe	ty (651.2)	Ø
1.5.1	Presence and effectiveness of obstacles (417.2)		NA
1.6	Presence of main linked switch (as required by 462.1.201)		
1.7	Operation of main switch (functional check) (643.10)		
1.8	Manual operation of circuit-breakers and RCD(s) (test button) to pro	ove disconnection (643.10)	
1.9	Correct identification of circuit details and protective devices (514.8	.1; 514.9.1)	
1.10	Presence of RCD six-monthly test notice at or near consumer unit/or	distribution board (514.12.2)	
1.11	Presence of non-standard (mixed) cable colour warning notice at or	r near equipment, where required (514.14)	
1.12	Presence of alternative supply warning notice at or consumer unit/d	distribution board (514.15)	
1.13	Presence of other required labelling (Please specify) (Section 514)		
1.14	Compatibility of protective devices, bases and other components; c damage, arcing or overheating) (411.3.2; 411.4; 411.5; 411.6; Section 2.2)	ons 432; 433)	3
1.15	Single-pole switching or protective devices in line conductors only (
1.16	Protection against mechanical damage where cables enter consum 522.8.11)		
1.17	Protection against electromagnetic effects where cables enter ferro	magnetic enclosures (521.5.1)	
1.18	RCD(s) provided for fault protection - includes RCBO(s)(411.4.204;	(a) 1 (2) (4) (4) (5) (4) (4) (5) (4) (5) (4) (5) (4) (5) (4) (5) (6) (6) (6) (6) (6) (6) (6) (6) (6) (6	Ø
1.19	RCD(s) provided for additional protection/requirements, where requ	uired - includes RCBO(s) (411.3.3; 415.1)	Ø
1.20	Confirmation of indication that SPD is functional (651.4)		NA
1.21	Confirmation that ALL conductor connections, including connections are tight and secure (526.1)	6 2007-19, av 50-90-6044, 60 (K 101-31556) 6-366509	
1.22	Adequate arrangements where a generating set operates as a swite		N/A
1.23	Adequate arrangements where a generating set operates in paralle	el with the public supply (551.7)	N/A
2.0 FINAL C 2.1	Identification of conductors (514.3.1)		
2.2	Cables correctly supported throughout their run (521.10.202; 522.8	5)	
2.3	Condition of insulation of live parts (416.1)	,	0
2.4	Non-sheathed cables protected by enclosure in conduit, ducting or	trunking (521 10 1)	Ø
2.4.1	To include the integrity of conduit and trunking systems (metallic an		
2.5	Adequacy of cables for current-carrying capacity with regard for the	•	
2.6	Coordination between conductors and overload protective devices	<u> </u>	Ø
2.7	Adequacy of protective devices: type and rated current for fault prof		0
2.8	Presence and adequacy of circuit protective conductors (411.3.1; S		Ø
2.9	Wiring system(s) appropriate for the type and nature of the installation	ion and external influences (Section 522)	0
2.10	Connected cables installed in prescribed zones (see Section D. Ext	tent and limitations) (522.6.202)	
2.11	Cables concealed under floors, above ceilings or in walls/partitions,	, adequately protected against damage (522.6.204)	
2.12	Provision of additional requirements for protection by RCD not	t exceeding 30 mA:	
2.12.1	For all socket-outlets of rating 32 A or less unless exempt (4.11.3.3	<u> </u>	
2.12.2	For the supply of Mobile equipment not exceeding 32 A rating for us	se outdoors (411.3.3)	
2.12.3	For cables concealed in walls at a depth of less than 50 mm (522.6		
2.12.4	For cables concealed in walls/partitions containing metal parts rega		Ø
2.12.5	For circuits supplying luminaires within domestic (household) premi		Ø
2.13	Provision of fire barriers, sealing arrangements and protection again	nst thermal effects (Section 527)	Ø
2.14	Band II cables segregated/separated from Band I cables (528.1)		Ø
2.15	Cables segregated/separated from communications cabling (528.2)		O
2.16	Cables segregated/separated from non-electrical services (528.3)		
2.17	Termination of cables at enclosures - indicate extent of sampli	ng in Section d of the report (section 526)	
2.17.1	Connections soundly made and under no undue strain (526.6)		

ELECTRICAL INSTALLATION CONDITION REPORT - DB Inspection Schedule

for Industrial/Commercial Premises

Requirements for Electrical Installations BS7671:2018+A2:2022 (IET Wiring Regulations 18th Edition)

3486000001591

2 17 2	No basic insulation of a conductor visible outside enclosure (526.8)	
2.17.3	Connections of live conductors adequately enclosed (526.5) Adequately connected at point of entry to enclosure (glands, bushes etc.) (522.8.5)	
2.17.4	Condition of accessories including socket-outlets, switches and joint boxes (651.2 (v))	
2.19	Suitability of accessories for external influences (512.2)	
2.20	Adequacy or working space/accessibility to equipment (132.12; 513.1)	
2.21	Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.3)	
3.0 ISOLAT	TION AND SWITCHING	
3.1	Isolators (Section 460; 537)	
3.1.1	Presence and condition of appropriate devices (462; 537.2.7)	N/A
3.1.2	Acceptable location - state if local or remote from equipment in question (462; 537.2.7)	NA NA
3.1.3	Capable of being secured in the OFF position (462.3)	N/A
3.1.4	Correct operation verified (643.10)	NA
3.1.5	Clearly identified by position and/or durable marking (537.2.6)	(NA)
3.1.6	Warning label posted in situations where live parts cannot be isolated by the operation of a single device (514.11.1; 537.1.2)	N/A
3.2	Switching off for mechanical maintenance (Section 464; 537.3.2)	
3.2.1	Presence and condition of appropriate devices (464.1; 527.3.2)	NA NA
3.2.2 3.2.3	Acceptable location - state if local or remote from equipment in question (537.3.2.4) Capable of being secured in the OFF position (462.3)	NA NA
3.2.4	Correct operation verified (643.10)	(NA)
3.2.5	Clearly identified by position and/or durable marking (537.3.2.4)	NA NA
3.3	Emergency switching/stopping (465; 537.3.3)	
3.3.1	Presence and condition of appropriate devices (Section 465; 537.3.3; 537.4)	NA
3.3.2	Readily accessible for operation where danger might occur (537.3.3.6)	N/A
3.3.3	Correct operation verified (643.10)	N/A
3.3.4	Clearly identified by position and/or durable marking (537.3.3.6)	NA
3.4	Functional switching (section 463; 537.3.1)	
3.4.1	Presence and condition of appropriate devices (537.3.1.1; 537.3.1.2)	NA NA
3.4.2	Correct operation verified (537.3.1.1; 537.3.1.2)	NA
	Condition of agricument in terms of IR retires at a (446.2)	
4.1	Condition of equipment in terms of IP rating etc (416.2)	
12		
4.2	Equipment does not constitute a fire hazard (Section 421) Enclosure not damaged/deteriorated so as to impair safety (134.1.1: 416.2: 512.2)	
4.3	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2)	
4.3 4.4	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2) Suitability for the environment and external influences (512.2)	⊘
4.3 4.4 4.5	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2)	
4.3 4.4 4.5 4.6	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2) Suitability for the environment and external influences (512.2) Security of fixing (134.1.1) Cable entry holes in ceiling above luminaires, sized or sealed so as to restrict the spread of fire: List number and location of luminaires inspected (separate page) (527.2)	⊘
4.3 4.4 4.5 4.6	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2) Suitability for the environment and external influences (512.2) Security of fixing (134.1.1) Cable entry holes in ceiling above luminaires, sized or sealed so as to restrict the spread of fire: List number and location of luminaires inspected (separate page) (527.2) Recessed luminaires (downlighters)	⊗
4.3 4.4 4.5 4.6 4.7 4.7.1	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2) Suitability for the environment and external influences (512.2) Security of fixing (134.1.1) Cable entry holes in ceiling above luminaires, sized or sealed so as to restrict the spread of fire: List number and location of luminaires inspected (separate page) (527.2) Recessed luminaires (downlighters) Correct type of lamps fitted (559.3.1)	
4.3 4.4 4.5 4.6 4.7 4.7.1 4.7.2	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2) Suitability for the environment and external influences (512.2) Security of fixing (134.1.1) Cable entry holes in ceiling above luminaires, sized or sealed so as to restrict the spread of fire: List number and location of luminaires inspected (separate page) (527.2) Recessed luminaires (downlighters) Correct type of lamps fitted (559.3.1) Installed to minimize build-up of heat by use of "fire rated" fittings, insulation displacement box or similar (421.1.2)	
4.3 4.4 4.5 4.6 4.7 4.7.1 4.7.2 4.7.3	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2) Suitability for the environment and external influences (512.2) Security of fixing (134.1.1) Cable entry holes in ceiling above luminaires, sized or sealed so as to restrict the spread of fire: List number and location of luminaires inspected (separate page) (527.2) Recessed luminaires (downlighters) Correct type of lamps fitted (559.3.1) Installed to minimize build-up of heat by use of "fire rated" fittings, insulation displacement box or similar (421.1.2) No signs of overheating to surrounding building fabric (559.4.1)	
4.3 4.4 4.5 4.6 4.7 4.7.1 4.7.2 4.7.3 4.7.4	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2) Suitability for the environment and external influences (512.2) Security of fixing (134.1.1) Cable entry holes in ceiling above luminaires, sized or sealed so as to restrict the spread of fire: List number and location of luminaires inspected (separate page) (527.2) Recessed luminaires (downlighters) Correct type of lamps fitted (559.3.1) Installed to minimize build-up of heat by use of "fire rated" fittings, insulation displacement box or similar (421.1.2) No signs of overheating to conductors/terminations (526.1)	
4.3 4.4 4.5 4.6 4.7 4.7.1 4.7.2 4.7.3 4.7.4 5.0 PART 7	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2) Suitability for the environment and external influences (512.2) Security of fixing (134.1.1) Cable entry holes in ceiling above luminaires, sized or sealed so as to restrict the spread of fire: List number and location of luminaires inspected (separate page) (527.2) Recessed luminaires (downlighters) Correct type of lamps fitted (559.3.1) Installed to minimize build-up of heat by use of "fire rated" fittings, insulation displacement box or similar (421.1.2) No signs of overheating to surrounding building fabric (559.4.1) No signs of overheating to conductors/terminations (526.1) SPECIAL INSTALLATIONS OR LOCATIONS
